

# Anomaly Detection Results

---

## ✓ Evaluate Curriculum Authentication

---

- Findings show potential for curriculum theft or sharing.
- Cross program access appears to still be in effect based on findings.
- Results found many unknown IP addresses that have accessed the curriculum across the US.

---

## ✓ Update Low Traffic Curriculum Pages

---

- Curriculum may need to be updated or reformatted.
- Potentially remove any outdated or extensive course material.
- Replace or add pages with Instructor walkthroughs to promote centralized access.

---

## ✓ Offer Post Grad Refresher Courses

---

- Graduates may benefit from online refresher courses.
- Refresher courses would allow better tracking for possible gaps during in class learning.
- Specialized Course Offerings - (Regression, Classification, Java, HTML, etc.)
